

1. Abstract

Our project “Aneri Beauty Care” is a web-based application designed for a local beauty care center to manage its daily operations online. The system allows customers to conveniently book and schedule appointments for multiple beauty services through online platform, view service details, and schedule appointments and booking according to their availability. It also enables the beauty care owner to manage customer records, staff details, service lists, billing, and payment transactions efficiently. This project helps reduce manual work, improves communication between customers and the beauty care center, ensures timely service delivery, and enhances the overall customer experience through an easy-to-use online platform.

2. Objectives

- To digitalize the daily operations of the Aneri Beauty Care parlour through a user-friendly online platform.
- To allow customers to book beauty services easily from home at their preferred time.
- To maintain proper records of customers, staff, services, appointments, and billing in a systematic way.
- To simplify the billing process and include online payment options for faster transactions.
- To simplify the billing process and include online payment options for faster transactions.
- To provide the administrator with easy access to reports and service data for better business analysis and decision-making.

3. Project Profile

3.1 Existing System:-

The current system relies entirely on manual paper-based records for handling appointments & bookings, customer details, and billing. Staff members record information by hand, which makes the process time-consuming and prone to errors. Tracking customer history and managing schedules is difficult, leading to inefficiency. This traditional approach lacks digital accessibility, reducing overall convenience for both staff and customer. .

3.2 Proposed System:-

The proposed system is a web-based platform designed to handle all core operations digitally, including appointments and booking, staff, and customer records. It streamlines tasks through an easy-to-use interface, reducing errors and saving time. Data can be accessed and updated in real-time, improving efficiency and transparency. This solution ensures better organization, faster service, and enhanced customer satisfaction.

3.3 Tools & Technologies:

Front End:

- 1.HTML 5
- 2.CSS 3
- 3.JavaScript ES6
- 4.Bootstrap (v5.3.2)
- 5.Python (v3.13.4)
- 6.Flask (v3.0.3)

Back End:

- 1.MySQL (v8.0)

Web Server:

- 1.XAMPP (Apache Server) (v8.2.4)
- 2.Gunicorn (v21.2.0)

Reporting Tool:

1.ReportLab (v4.0.7)

Diagram Tool:

1.draw.io(web-based)

Other Tools:

1.Visual Studio Code (v1.90.0)

2.MS Word (v2021)3.MS PowerPoint (v2021)

3.4 List Of Modules With Description

- 1.** Customer Management
- 2.** Staff Management
- 3.** Appointment & Booking Management
- 4.** Service Management
- 5.** Product Management
- 6.** Inventory Management
- 7.** Order Management
- 8.** Offers Management
- 9.** Billing & Payment Management
- 10.** Delivery Management
- 11.** Complaint &Feedback Management

Brief Description of Each Module:**1. Customer Management :-**

- Manages complete customer details for beauty care services.
- Customers can register by entering basic information such as name, mobile number, email, address, and password.
- Registered customers can log in to book services, view appointments and can book services, and submit feedback.
- Admin can view, update, or delete customer records as needed.
- Customers receive notifications about appointments, offers, and important updates.

2. Staff Management :-

- Admin can add, update, and manage staff details, set availability, assign service roles, and handle recruitment as needed.
- Customers can view available staff and their service expertise while booking, but names will be hidden if a staff member is already occupied.
- The module helps match customers with the right staff based on their preferred services.

- Ensures efficient staff scheduling for service & delivery management to improve overall customer experience.

3. Appointment & Booking Management:-

- Customers can either book a service at home or schedule an appointment at the salon.
- salon services are handled through appointments, whereas home services are handled through bookings.
- The system displays only available time slots, hiding booked or unavailable ones to avoid double bookings.
- Admin can manage appointments by accepting or canceling requests based on slot and staff availability.
- Customers can choose specific staff if desired and will be notified if their requested slot is not available.
- This module ensures organized slot-based scheduling, improves service efficiency, and enhances the overall customer experience.

4. Service Management:-

- The beauty care centre offers a variety of services including hair cutting and styling, eyebrow shaping, bridal makeup, and makeovers.
- Customers can select services or choose from available packages such as Bridal Package, Sider Package, Wax Package, Facial Package, and more.
- Services are categorized as Home Services and In-Centre Services.
- Charges for home services depend on the distance from Beauty Care centre to the customer's location.
- Admin can manage service listings, update prices, and display seasonal offers or discounts.

5. Product Management:-

- Helps manage the list of beauty products sold by Aneri Beauty Care.
- Admin can add, update, or remove product details such as name, category, brand, price, quantity, and description.
- Products can be categorized (e.g., skincare, haircare, makeup) for better organization.
- Customers can view available products, check details, and place orders.

6. Inventory Management:-

- Tracks and manages the stock of all products and supplier details for the products used at Aneri Beauty Care.
- Admin can monitor product quantities, update stock levels, and record new stock entries or usage.
- Sends alerts when product quantities fall below the minimum threshold.
- Ensures efficient stock management, reduces wastage, and supports uninterrupted service delivery

7. Orders Management:-

- Manages customer product orders placed through the Aneri Beauty Care platform.
- Customers can place orders, view product details, and track their order status (pending, out for delivery, delivered).
- Admin can manage orders by confirming, updating, or cancelling them and assign delivery personnel to each order.

9. Offers Management:-

- Helps manage and showcase various offers, discounts, and promotional deals.
- Admin can create special offers on individual services, bundled service combos, or complete packages.
- Each offer includes details like offer name, discount value, applicable services or packages, validity period, and terms.

10. Billing & Payment Management:-

- It will generate and share the bill with the customer.
- Displays the total cost of services or packages availed.
- Supports payment method through Razor pay.

10. Delivery Management:-

- Manages and tracks the delivery of beauty products ordered by customers.
- Admin assigns delivery work to staff with their details.
- Delivery staff can update the delivery status.
- Customers can track delivery progress and receive updates.

11. Complaint &Feedback Management:-

- Allow Customer to submit complaints , share feedback, and help improve the quality of services and customer experience.
- Admin can view all complaints and feedback.
- Analyze common issues to improve service quality.

4. Feasibility Study

Technical Feasibility:

The system is developed using Python, HTML, CSS, JavaScript, Flask, and MySQL. The technology is easily available and easy to use.

Economic Feasibility:

Low development cost since open-source software is used.

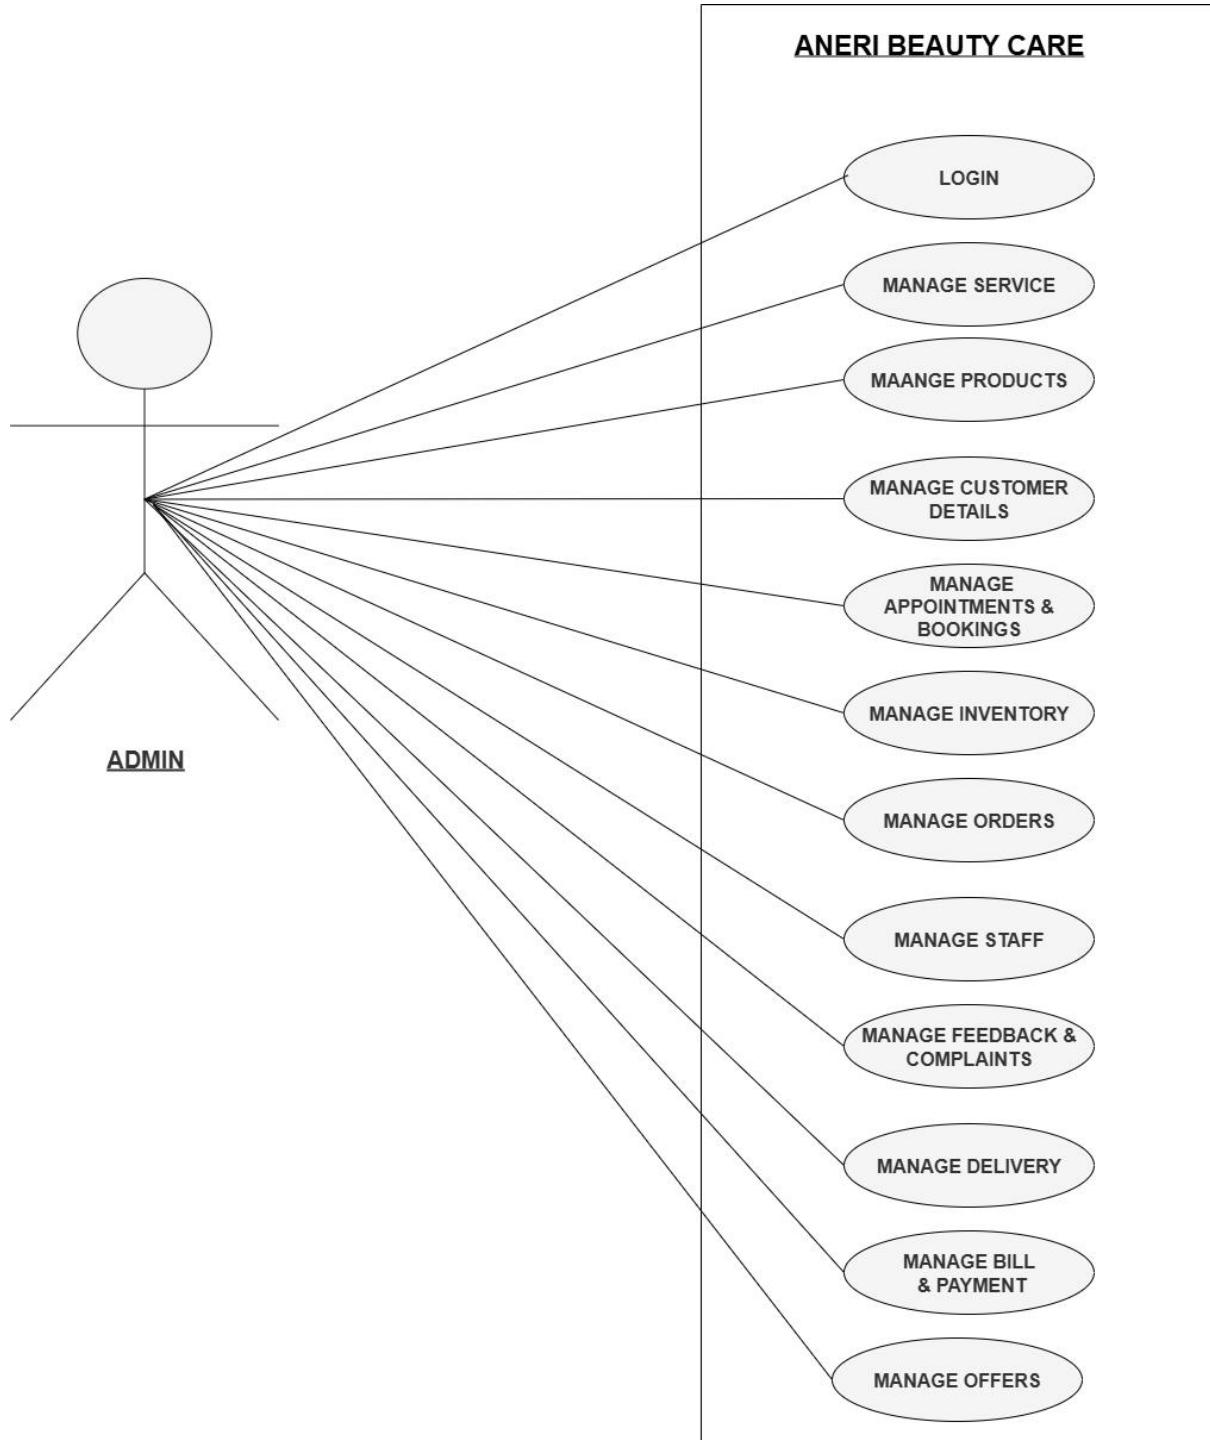

Operational Feasibility:

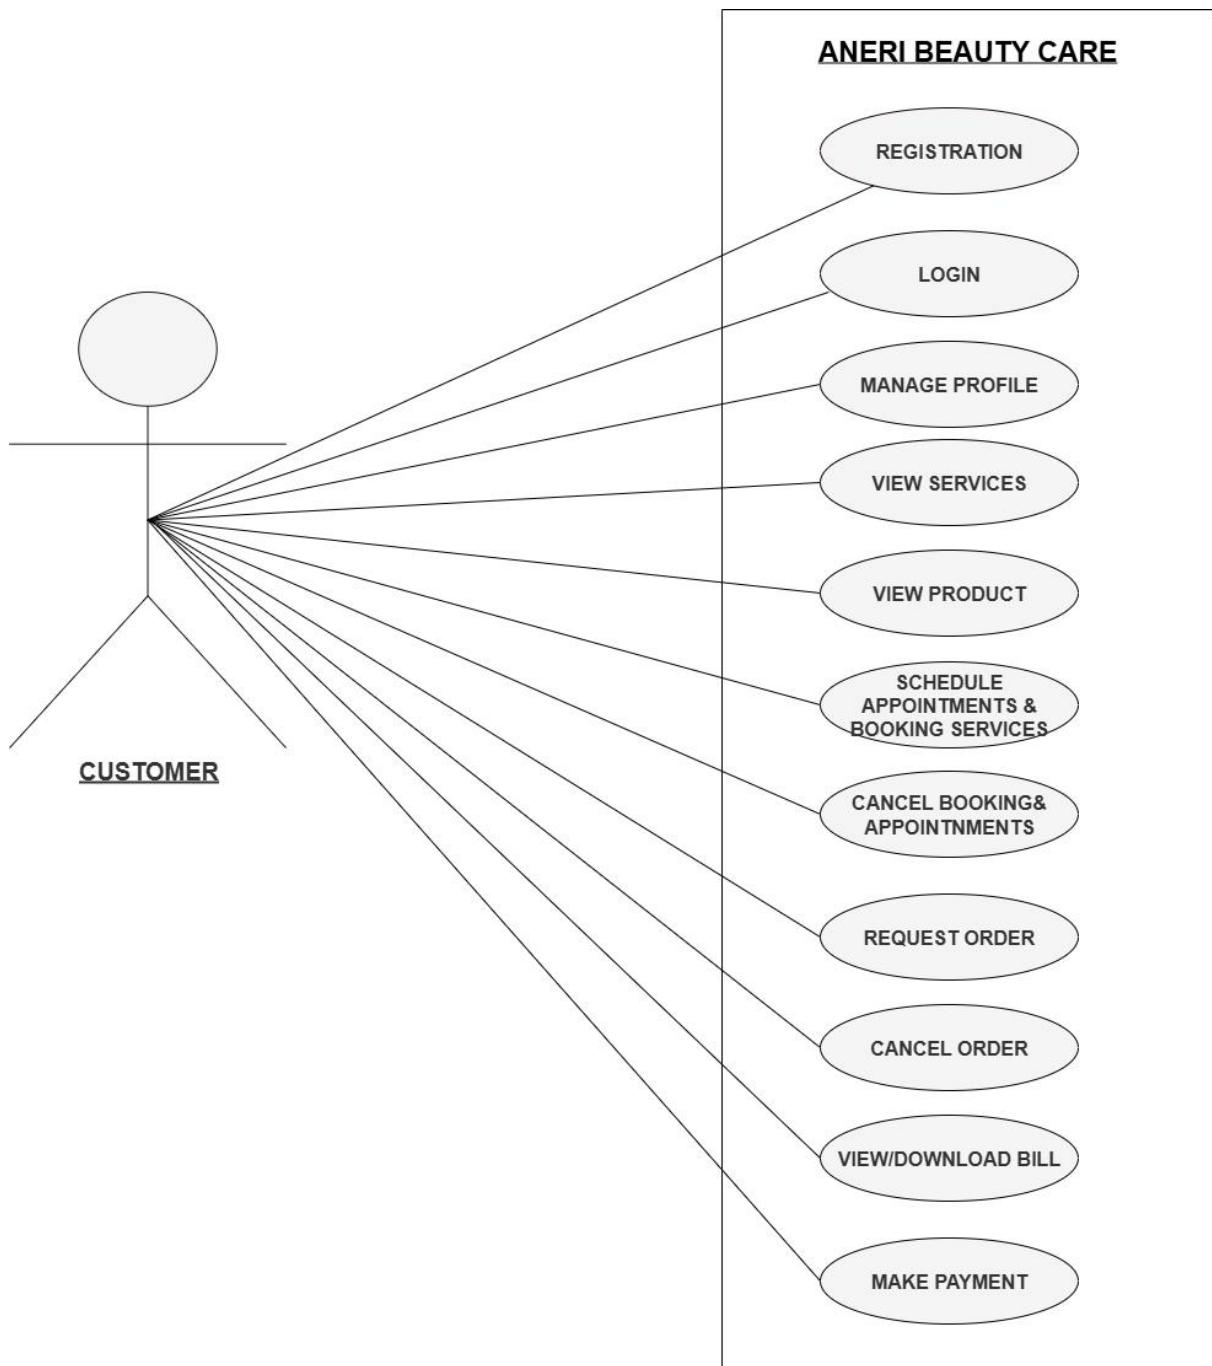

Simple and user-friendly interface makes it easy for customers and shop staff to use.

| 1803 | 103 | 1606 | 01/12/2025 | 550 |

Bill Detail:-**Primary key : Billdetail_id****Foreign key : Bill_id , Appointment_id , Bookingdetail_id****Description : It Stores Bill Details**

| Field name | Data type | Size | Constraints | Description |
|------------------|-----------|------|-------------|----------------------------|
| Billdetail_id | Int | -- | Primary key | It stores billdetail id |
| Bill_id | Int | -- | Foreign key | It stores bill id |
| Appointment_id | Int | -- | Foreign key | It stores appointment id |
| Bookingdetail_id | Int | -- | Foreign key | It stores bookingdetail id |

Example:-

| Billdetail_id | Bill_id | Appointment_id | Bookingdetail_id |
|---------------|---------------|----------------|------------------|
| 1901 | 1801(Krishna) | 201(Krishna) | 1001 |
| 1902 | 1802(Hetvi) | 202(Hetvi) | 1002 |
| 1903 | 1803(Manisha) | 203(Manisha) | 1003 |

Payment:-**Primary key : Payment_id****Foreign key : Customer_id , Bill_id****Description : It Stores Payment Details**

| Field name | Data Type | Size | Constraints | Description |
|--------------|-----------|------|-------------|------------------------|
| Payment_id | Int | -- | Primary key | It Stores Payment id |
| Customer_id | Int | -- | Foreign key | It stores Customer id |
| Bill_id | Int | -- | Foreign key | It stores Invoice id |
| Amount | Float | -- | Not null | It stores amount |
| Payment_mode | Varchar | 50 | Not null | It stores Payment mode |
| Status | Varchar | 60 | Not null | It stores status |

Example:-

| Payment_id | Customer_id | Bill_id | Amount | Payment_mode | Status |
|------------|-------------|---------|--------|--------------|------------|
| 2001 | 101 | 1801 | 350 | Cash | Success |
| 2002 | 102 | 1802 | 350 | Credit | Unrefunded |
| 2003 | 103 | 1803 | 550 | Card | Pending |

Complain:-**Primary key : Complain_id****Foreign key : Customer_id****Description : It Stores Complain Details**

| Field name | Data type | Size | Constraints | Description |
|---------------|-----------|------|-------------|--------------------------------|
| Complain_id | Int | -- | Primary key | It stores complain id |
| Customer_id | Int | -- | Foreign key | It stores customer id |
| Ratings | Int | -- | Not null | It stores ratings |
| Feedback_date | Date | 30 | Not null | It stores complain date |
| Description | Varchar | 40 | Not null | It stores complain description |
| Category | Varchar | 50 | Not null | It stores complain category |

Example:-

| Complain_id | Customer_id | Ratings | Complain_date | Description | Category |
|-------------|-------------|---------|---------------|---|----------|
| 2011 | 101 | 1 | 10/11/2025 | Stores complain id, ratings and category | Product |
| 2012 | 102 | 2 | 15/12/2025 | Stores complain id, ratings and category | Service |
| 2013 | 103 | 1 | 31/12/2025 | Stores complain id , ratings and category | Delivery |

Feedback:-**Primary key : Feedback_id****Foreign key : Customer_id****Description : It Stores Feedback Details**

| Field name | Data type | Size | Constraints | Description |
|---------------|-----------|------|-------------|--------------------------------|
| Feedback_id | Int | -- | Primary key | It Stores feedback id |
| Customer_id | Int | -- | Foreign key | It Stores customer id |
| Ratings | Int | -- | Not null | It Stores ratings |
| Feedback_date | Date | 60 | Not null | It Stores feedback date |
| Description | Varchar | 70 | Not null | It Stores feedback description |
| Category | Varchar | 80 | Not null | It Stores feedback category |

Example:-

| Feedback_id | Customer_id | Ratings | Feedback_date | Description | category |
|-------------|-------------|---------|---------------|--|----------|
| 2021 | 101 | 9 | 12/11/2025 | Stores feedback id , ratings for service , staff behaviour , etc.. | Service |
| 2022 | 102 | 8 | 12/12/2025 | Stores feedback id , ratings for service , staff behaviour , etc | Service |
| 2023 | 103 | 9 | 31/12/2025 | Stores feedback id , ratings for service , staff behaviour , etc | Service |

8. Conclusion

The system successfully automates the working of a beauty care center.
It minimizes paperwork and reduces manual efforts.
The system ensures proper record management, maintaining accurate and up-to-date data.
It improves customer satisfaction by providing a seamless booking and service experience.
The system proves efficient, reliable, and easy to maintain for future updates.

9. Future Scope

Mobile app version for easy access.

Integration with payment gateways .

Option to send service reminders and booking updates through system.

SMS/email notification system for customers.

Automatic report generation for admin.

10. Bibliography

This project was made possible with the help of various online resources and tools. The following list includes the platforms, software, and websites used in the development and documentation of the Aneri Beauty Care project.

Online Resources:

1. Google: www.google.com
2. www.codewithharry.com
